Locking Stor-A-Key

Overview

Locking Stor-A-Key is an affordable key case with a settable combination lock and powerful magnet. The foam insert prevents the key from falling out. The design allows a simple one hand operation. It can be used for storage of spare/hidden keys of cars, office files,....

Construction and installation

The Locking Stor-A-Key is made of weather resistant plastic. It has a powerful magnet to attach to any ferrous material.

For attaching to non-ferrous material, there is a metal back plate with adhesive tape included. So no tools are needed for installation. It is equipped with an anchor point for a strap or cable tie.

Operation

Set the right code on the combination lock and the lid will open. After closing the lid, set an incorrect code for locking the key case.

Applications

Locking Stor-A-Key is an attractive key box to prevent loosing your keys. It offers convenient key holding for the whole family.

Guidelines

Locking Stor-A-Key is a convenience product, not a security product. Do not leave the key in the key case unnecessary.

Standard Features

- Affordable locking key case
- Settable combination lock
