Stor-A-Key

Overview

Stor-A-Key is a simple, affordable key case for hiding keys that attaches to almost any clean surface. The foam insert and a strap keep the key in place. It can be used for inexpensive storage of emergency/hidden keys for vehicles or houses.

Construction and installation

The Stor-A-Key is made of weather resistant plastic. It has a powerful magnet to attach to any ferrous material. For attaching to non-ferrous material, there is a metal back plate with adhesive tape included. So no tools are needed for installation.

Operation

Simply insert your key under the strap and close the key case.

Applications

Emergency/hidden access to car or home keys.

Guidelines

The Stor-A-Key is a convenience product, not a security product. Do not leave the key in the key case unnecessary.

Standard Features

- Affordable and simple to use
- Weather resistant plastic housing
- Foam and strap keeps key in place
- Powerful magnet for fixture to any ferrous material
