DORS 820

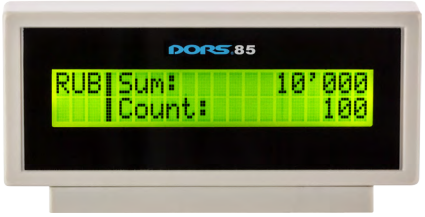

Dual CIS multicurrency counter with SN reading and basic fitness sorting

CE

We pass ECB test every January

The machine is intended to be used by:

- Banks and non-banking credit organizations,
- Exchange offices,
- Vaults of Cash-In-Transit Companies.

Key advantages:

- **Serial number reading** and transferring to a connected printer or PC.
- **Comparison of the serial numbers** on the same banknote.
- **Serial number character recognition** (all existing types of letters and digits)
- **Black list for the serial numbers**;
- **20+ currencies in one template** according to customer's choice;
- Automatic recognition of 5 pre-selected currencies;
- **Multicurrency Mix Mode**;
- **8 kinds of the authenticity control** including **dual CIS**, IR, VI, UV, MG;
- Note sorting by orientation, face, denomination, fitness;
- User-friendly machine due to its 4.3" touch screen and advanced on-screen menu;
- Multilanguage interface;
- Connectivity to an external display, a printer, a CCTV system;
- Software updates are available via Internet without a participation of a technician.
